Abstract: A multi-purpose refractory water-proof material is composed of high-magnesia powder (MgO is greater than 50%) or high-alumina powder (Al₂O₃ is greater than 60%) (40-70 Wt.%), high-alumina cement over No.625 (8-18 Wt.%), refractory clay (10-25 Wt.%), electrically dusted coal ash (4-13 Wt.%), calcium carbonate (2-5 Wt.%) and sodium fluosilicate (1-5 Wt.%), and features easily available raw materials, low cost and high strength. It can be used to make bulk refractory with light weight, low thermal conductivity and low expansibility.
